

12. Environmental Policy

The management and staff of Krost are committed to the identification of environmentally efficient manufacturing, storage and fabrication strategies for the delivery of products to its clients. The company recognises that compliance with environmental legislation is a shared responsibility which requires the cooperation of all people in the workplace, including consultants and suppliers. Some of the strategies are managed by contractors who are audited by Krost to measure compliance with agreed environmental plans for their activities.

The following actions are fundamental to Krost establishment and continuous improvement of the system.

- Consultation between client, consultants and staff in relation to environmental issues. Working with clients to identify environmental efficiencies that need to be addressed as part of the product specifications and installation.
- Ongoing identification, assessment and control of workplace environmental risks.
- Active training of staff in environmental issues, and the development of a response team/action methodology to address emergencies.
- The identification of dangerous goods and the provision of material safety data sheets (MSDS) for easy reference at the point of storage and transportation of dangerous goods/waste.
- Internal reviews of the system occur to identify potential problems and identify strategies for rectification and continuous improvement.
- Policy and procedures for the segregation of waste for recycling and the management of the system.
- Environmental objectives are established and processes put in place to measure them, revising targets as operational experience dictates changes.
- Management seeks to continuously improve the environmental management system and identify positive aspects which may be applied to client projects.
- Documentation is created, referenced and controlled according to the quality system processes.
- Krost monitor environmental legislation to make sure that its system complies with its requirements.
- Management and staff are committed to the segregation, recycling and disposal of waste generated at project sites.
- Krost have developed an environmental management system that is compliant with the requirements of ISO 14001-2004 and associated legislation.
- Krost management endorses strategies for the reduction of pollution.
